Professional Profile - Detailed

A versatile and skilled techno-functional professional with leadership qualities and excellent hands-on experience in Program & Project Management, Enterprise & Non-Enterprise Applications as well as Supply Chain Management and Logistics operations.

An assertive senior level executive with outstanding interpersonal, communications, negotiation, conflict management and people management skills.

Have handled following responsibilities in the **Program Management** role:

- Guarding the viability of the vision and the business case
- Ensuring an appropriate programme or project management framework is in place.
- Getting project funds from the sponsors
- Leading the program to its successful completion
- Managing key "strategic" risks
- Maintaining strategic alignment between the program and the organization
- Interfacing with the senior stakeholders.
- Daily program management throughout the program life cycle
- Defining the program governance (controls)
- Planning the overall program and monitoring the progress
- Managing the program's budget
- Managing risks and issues and taking corrective measurements
- Coordinating the projects and their interdependencies
- Managing and utilizing resources across projects
- Managing stakeholders' communication
- Aligning the deliverables (outputs) to the program's "outcome" with the aid of the business change manager
- Managing the main program documentations such as the program initiation document.
- preparing the programme brief, project initiation documents or equivalent and business case among other documents

Have handled following responsibilities in the **Project Management** role:

- Managing and leading the project team.
- Recruiting project staff and consultants.
- Managing co-ordination of the partners and working groups engaged in project work.
- Detailed project planning and control.
- Developing and maintaining a detailed project plan.
- Managing project deliverables in line with the project plan.
- Recording and managing project issues and escalating where necessary.

- Resolving cross-functional issues at project level.
- Managing project scope and change control and escalating issues where necessary.
- Monitoring project progress and performance.
- Providing status reports to the project sponsor.
- Managing project training within the defined budget.
- Liaises with, and updates progress to, project board/senior management.
- Managing project evaluation and dissemination activities.
- Managing consultancy input within the defined budget.
- Final approval of the design specification.
- Working closely with users to ensure the project meets business needs.
- Definition and management of the User Acceptance Testing.
- Identifying user training needs and devising and managing user training programs.
- Providing regular status reports to the steering committee.
